

# X.Org X11R7.5 on Darwin and Mac OS X October 2009

## 1. Introduction

X11R7.5, a freely redistributable open-source implementation of the X Window System (<http://www.x.org/>) from the X.Org Foundation (<http://www.x.org/wiki/XorgFoundation>), has been ported to Darwin (<http://developer.apple.com/Darwin/>) and Mac OS X (<http://www.apple.com/macosx/>).

Most of the current work on X for Darwin and Mac OS X is centered around the XQuartz Project (<http://xquartz.macosforge.org/>) at MacOSforge (<http://macosforge.org/>). If you are interested in up-to-date status, want to report a bug, or are interested in working on X11 for Darwin, stop by the project website at <http://xquartz.macosforge.org/>
